

## ISSUE

There has been no contact with Research Site 45-Q (located outside [REDACTED]) since 0231. The cause of the continued non-communication must be discovered and the situation resolved using whatever means necessary.

## BACKGROUND

At 0231, RS 45-Q (henceforth "the facility") experienced a temporary loss of commercial power (henceforth "the event"). Commercial power was restored at 0234. The event should have been immaterial; the facility has on-site UPS systems and generators for this eventuality. However, since the event, communication with the facility has not been re-established. No personnel have exited the facility since the event.

Following two hours of non-communication, a Special Weapons and Tactics team from [REDACTED] was scrambled following an agency-provided anonymous tip that a terrorist act within the facility had transpired. The SWAT team entered the facility via a maintenance entrance at 0447.

As of 0950, there has been no communication from the SWAT team. Observers and equipment have not detected weapons discharges from inside the facility.

## CURRENT STATUS

Condition of the facility and associated personnel is unknown. Condition of research materials and equipment is unknown. Enemy combatants may be present in the facility.

## KEY CONSIDERATIONS

"Shadewalker" research is classified. Dr. Mikaela Kolnikov is the facility director and lead researcher. Disclosure of "Shadewalker" data will occur on a need-to-know basis determined by Dr. Kolnikov or, if Dr. Kolnikov is unavailable, by the most senior staff researcher on-site.

#### OPTIONS

The facility houses a fortified bunker in its sub-basement. This is the most likely location of Dr. Kolnikov or a senior researcher. Locate Dr. Kolnikov or a senior researcher and tap his or her expertise for a sitrep. Determine how best to control the situation from there.

#### CONCLUSION

Rendezvous at [REDACTED]. Enter the facility. Locate Dr. Kolnikov or other source of intel. Neutralize enemy combatants. Stabilize the situation and/or extract "Shadewalker" research personnel for debriefing.
